The City of Chestermere is updating its Municipal Development Plan (MDP) to ensure our community continues to grow in a sustainable manner. The new MDP will establish a vision for the City and guide future growth, land use and development, economic opportunities, public spaces, and infrastructure over the next 25 years. The vision and policies identified in the new MDP will provide direction and guidance for Chestermere's tomorrow.

The new MDP will create a roadmap for future growth and development by tackling our city's most pressing issues, including:

Enabling growth and development that is cost effective

Supporting social needs of our community

Infrastructure costs and maintenance

Providing recreational opportunities

Managing our tax base and service delivery

Seeking to continue the unique Chestermere identity

Housing availability

Economic development
